*Where this is a new fund, the risk rating is only an estimate by Starlight Capital. Generally, we determine the risk rating for each fund in accordance with a standardized risk classification methodology in NI 81-102 that is based on the fund's historical volatility as measured by the 10-year standard deviation of the returns of the fund. Standard deviation is a common statistic used to measure the volatility and risk of an investment. Funds with higher standard deviations are generally classified as being more risky. Just as historical performance may not be indicative of future returns, a fund's historical volatility may not be indicative of its future volatility. You should be aware that other types of risk, both measurable and non-measurable, also exist.

¹Active share measures the percentage of a portfolio's holdings that are different from those in its benchmark. Active share shows how the manager is actively exploiting opportunities that are not reflected in the index. The benchmarks used for analysis for i) global infrastructure public securities is the S&P Global Infrastructure Index (CAD); ii) global real estate public securities is the FTSE EPRA/NAREIT Developed Total Return Index (CAD); and (iii) global public securities is the MSCI World Index (Gross Total Return) (CAD).

²The net management fee for each asset-tier level is calculated based on an investment at the mid-point of each corresponding asset-tier level. The net management fee includes the management fee rebates which, are automatically reinvested in additional units of the fund.

³For advisors that want management fees and/ or service fees charged separately outside of the funds and the ability to customize service fees between the advisor and their client monthly by redeeming units in their clients account.

Commissions, trailing commissions, management fees and expenses all may be associated with investment funds. The indicated rates of return are the historical annual compound total returns net of fees (except for figures of one year or less, which are simple total returns) including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Investment funds are not guaranteed, their values change frequently, and past performance may not be repeated. Please read the prospectus or other applicable offering document before investing. Investors should consult with their advisors prior to investing.

The information contained herein is not an offer to sell nor a solicitation to buy any security. Such an offer can only be made by prospectus or other applicable offering document.

There are ongoing fees and expenses associated with owning units of an investment fund. An investment fund must prepare disclosure documents that contain key information about the fund. You can find more detailed information about the fund in these documents.
