Important disclaimers.

Distributions may consist of net income, dividend, net realized capital gains and/or return of capital and are taxable in the hands of the investor. Monthly and quarterly distributions are based on record date. The final distribution in respect of each taxation year is paid or payable by December 31st of each year unless an election for a tax year-end of December 15th has been made or at such other times as may be determined by the fund's manager. Distributions are automatically reinvested unless an investor elects to receive them in cash, except the ETF and PTF series where distributions are automatically paid in cash. If distributions paid by the fund are greater than the performance of the fund, distributions paid may include a return of capital and an investor's original investment will decrease. A return of capital is not taxable to the investor but will generally reduce the adjusted cost base of the units held for tax purposes. If the adjusted cost base falls below zero, investors will realize capital gains equal to the amount below zero. Investors should not confuse a distribution rate with its performance, rate of return or yield.
